

Speed, Efficiency, Comfort

Elite Honda Jet (N512KR)

The HondaJet Elite S has a range of 1,437 nautical miles, making it the farthest-flying aircraft in its class. This is made possible by the Elite S's refined aerodynamics and increased fuel capacity, which maximizes range for longer trips. The Over-The-Wing Engine Mount configuration creates a natural sound barrier, making for a more tranquil flight while significantly reducing ground-detected noise.

Performance

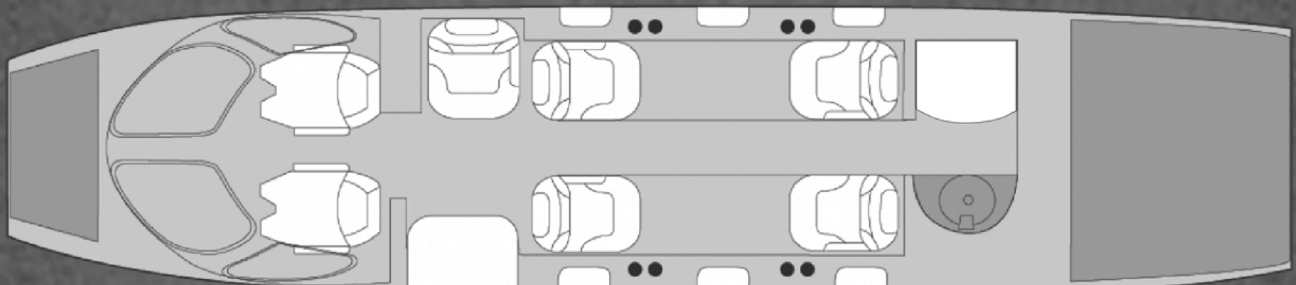

1,437 Nautical Miles / 422 MPH Cruise Speed

Interior

4-5 Passengers / Cabin Dimensions

Our King Air Fleet is great
for family vacations, and business travel

Prestige **King Air C90 (N4615C)**

"Built-for-comfort, not for speed" has been the design mantra for the King Air 90 series for more than half a century. The 227 cubic foot cabin can seat up to eight passengers and usually has a club configuration. Some aircraft have an additional seat or two in the 48 cubic foot aft baggage compartment. In the aft cabin, there is a full-width, internally service lavatory with a privacy curtain. Both engines on this aircraft are recently overhauled, we have upgraded the interior as well as painted the outside of the aircraft.

Performance

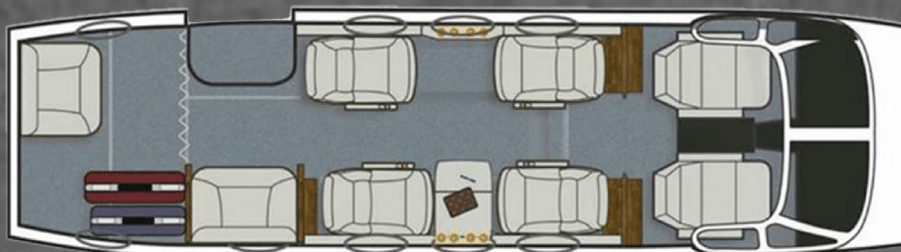

1,543 Nautical Miles / 310 MPH Cruise Speed

Interior

6-7 Passengers / Cabin Dimensions: 12'7" x 4'6" x 4'9" ft.
